

SurePass One-Time Passcode Tokens

Time-based Two-factor Authenticator for secure access.

SurePass OTP Tokens are durable, strong security tokens that:

- **Reduce costs** by preventing fraud and lowering overhead
- **Secures VPN, enterprise accounts** with a convenient credential that fits on a keychain
- **Delivers compliance** with regulatory requirements like PCI, HIPAA, and FFIEC

Username and password are no longer secure enough for today's cloud security requirements. With **SurePass OTP Tokens**, you will **elevate the security level** of your customers or employees and **lower your overall risk** of a security breach.

Always-on Time-based Token
1-3/4" x 7/8" x 3/8"

SurePass OTP tokens are available as a mini keyfob, always on with 6-digit, Time-based OATH TOTP codes that change every 30 seconds. Convenient, 10-second segment countdown bars on the left show time remaining until the next code appears.
