

Secure Single Sign-On (Secure SSO) Datasheet

Secure Access to Any Application, by Any User, on Any Device

To adopt secure single sign-on quickly and cost-effectively, enterprises need to be able to leverage their existing IT infrastructures. SurePassID's Secure Single Sign-On (Secure SSO) and Strong Authentication Gateway seamlessly integrate with existing applications, directory stores, and third-party authentication systems. The result is the most rapid, flexible, and cost-effective way for enterprises to adopt single sign-on while meeting security and corporate governance requirements.

Secure Single Sign-On (Secure SSO) – The Right Choice for...

Any enterprise seeking to securely embrace Bring Your Own Device (BYOD) while meeting information security, regulatory compliance, and corporate governance requirements.

IT organizations needing to eliminate password fatigue and identity confusion to reduce costs and increase productivity.

Large enterprises and government organizations with on-premises authentication servers.

Features

- **Secure Single Sign-On (Secure SSO)** – Secure one-click access to any SAML-compliant application, or to custom applications via the SurePassID SDK/API.
- **Platform-agnostic mobile access** – Support for Android™, iOS®, Blackberry™, Windows® Phone, and more.
- **Strong Authentication Gateway** – Authenticate cloud, web and mobile applications using an existing on-premises authentication server.
- **Multiple two factor authentication (2FA) options** – Mix-and-match support for the widest range of methods and tokens.
- **FIDO (Fast IDentity Online) support** – Authenticate users via passwordless, transparent FIDO U2F or UAF.
- **Seamless integration with existing IT infrastructures** – Supports multitude of VPNs, credentials, applications, directory stores, and cloud-connected devices.
- **Auditing and reporting** – Centralized, automated auditing and reporting of users, applications, and login activity.
- **Flexible deployment** – Deploy as a multi-tenant cloud service, on-premises server, or enterprise-class authentication services VM.

Benefits

- **Secure, compliant access**
- **Maximum flexibility**
- **Rapid deployment**
- **Reduced costs and complexity**
- **Scalable and reliable**
- **No vendor lock-in**

Secure Single Sign-On (Secure SSO) Datasheet

Secure Access to Any Application, by Any User, on Any Device

For Users

One-Click Access to Business Applications from Any Device

- Continue using personal devices to access business applications – securely
- Choice of many convenient strong authentication options

For Administrators

Lock Down Any Application, for Any User, on Any Device

- Securely embrace “Bring Your Own Device” (BYOD)
- Eliminate password fatigue and identity confusion
- Leverage existing IT infrastructure, including on-premises authentication servers

For Executives

Increased Security and Reduced Costs

- Meet compliance and corporate governance requirements
- Reduce costs through on-demand pricing and productivity gains
- Gain visibility into processes and metrics across the hybrid cloud

Authentication Methods

Single-Factor Authentication:

Username and password

Multi-Factor Authentication Options:

OATH Event-based OTP (HOTP)
OATH Time-based OTP (TOTP)
OATH Challenge/Response (OCRA)
FIDO Universal Auth. Framework (UAF)
FIDO Universal Second Factor (U2F)

Supported Tokens

Hard Tokens:

FIDO UAF devices (biometric)
FIDO U2F devices (non-biometric)
OTP display cards
OTP key fobs and mini-key fobs
OTP USB flash drives
.NET™ and Java™ smart cards

Soft Tokens:

Mobile OTP apps (smart phones, tablets)
Browser OTP (desktops, laptops, tablets, smart phones)

About SurePassID

SurePassID is a provider of next-generation identity and access management solutions for the hybrid cloud. SurePassID seamlessly integrates with existing IT infrastructures to enable secure access to any application, on any device, by any user. SurePassID’s on-demand solution offers secure single sign-on, identity and access management, directory integration, automated provisioning and deprovisioning, strong multi-factor authentication, support for legacy on-premises authentication servers, and customizable deployment options.

SurePassID offers its solution direct and via a global network of resellers and integrators. For more information visit www.surepassid.com.
